PROJECTS

Study Sphere <i>React.js, Python, Node.js, Express, MongoDB, Docker</i>	GitHub Live
– Architected a full-stack learning platform serving 500+ active user sessions, integrating the Gemini API to dynamically process YouTube URLs into structured transcripts, summaries, and quizzes. – Designed and deployed 8 secure REST APIs with OAuth authentication and containerized the architecture via Docker, optimizing data ingestion throughput by 35% and reducing environment deployment times by 40%.	
Pletto <i>React.js, Node.js, Express, PostgreSQL, Redis, WebSockets, CRDT (Yjs)</i>	GitHub Live
– Architected a distributed real-time collaboration system unifying documents, chat, video meetings, and whiteboards, handling concurrent data updates with sub-50ms synchronization latency. – Implemented CRDT-based conflict resolution (Yjs) and event-driven WebSocket & Redis Pub/Sub architecture, reducing message packet loss by 95% and supporting seamless multi-user live synchronization.	

EXPERIENCE & INVOLVEMENT

Open-Source Contributor – ECWoC (Elite Coders Winter of Code)	Dec 2025 – Mar 2026
– Resolved critical UI state-management bugs across React open-source repositories, enhancing component render efficiency and cross-device responsiveness. – Completed rigorous peer code reviews and collaborated with repository maintainers to merge pull requests under tight release timelines.	
Technical Team Member – CodeSpace Club, GL Bajaj	Sep 2025 – Present
– Co-organized technical workshops, hackathons, and competitive programming contests impacting over 100+ student developers.
