Projects

Study Sphere | React, Node.js, Express.js, MongoDB, Gemini API, JWT, Docker

[GitHub](#) | [Live](#)

- Full-stack learning platform that accepts a YouTube URL and returns an AI-generated transcript, summary, and quizzes via the Gemini API, with playlist-based progress tracking
- Designed 8 REST APIs with OAuth-secured routes, containerized the app with Docker for consistent dev/prod environments

Clover | React, Node.js, Express.js, MongoDB, Python

[GitHub](#) | [Live](#)

- Insurance platform for India's gig workers with policy browsing, instant premium estimation, and an admin dashboard for claim approvals
- Premium engine uses an ML regression model (10+ features: occupation, income, location risk) served as a Python microservice integrated via Express.js

DataShield | Chrome Extension MV3, React, Python, Flask, Node.js, MongoDB, spaCy

[GitHub](#)

- Chrome extension that silently fetches and scores a site's privacy policy (0–100) using spaCy NLP, displaying a color-coded badge with no user interaction required
- Flask microservice handles clause extraction; results are cached in MongoDB and visualized as a risk trend dashboard in the extension popup
